

Over 5000 VXI cards and mainframes in stock. 1000's of pieces of Test Equipment in stock.

Looking for Test Equipment?
Visit us on the web at
www.recycledequipment.com

Recycled Equipment buys, sells, and repairs VXI cards, VXI mainframes and Test Equipment. We have tens of thousands of pieces of Electronic Test Equipment and one of the worlds largest selections of VXI cards. We have VXI cards by almost every manufacture; from Agilent to Ziatech. **Every item on our website is IN STOCK and ready to ship with in 24 hours.**

Sell your equipment for cash

Recycled Equipment is interested in buying your surplus equipment! Call us today at **(410)685-1997** or email to **recycled@usimperio.com**

Sell your equipment on consignment

Recycled Equipment can sell your equipment on consignment. This allows you to get retail prices for your equipment with out the hassle.

SIGNAL ANALYZERS

HP 70000 Modular Measurement System (cont'd)

Components

(See page 119 for standard HP 70000 modular spectrum analyzer systems.)

	Price	
HP 70001A System Mainframe	\$5,500	
Provides all necessary power, cooling, digital interface, and EMI shielding for any width module. Fits any standard EIA rack and holds a maximum of eight 1/8-width modules. Modules are automatically connected to power, digital interface, and forced-air cooling.		
HP 70206A System Graphics Display	\$7,000	
A full-width, stand-alone, menu-driven interface for the HP 70000 system. Presents measurement results and configuration information with high-resolution-graphic, trace, text, and marker capability. Includes a 9-inch CRT, data and control keys, and an analog control knob. Can be stacked or racked with the HP 70001A mainframe or located up to 30m or more away from the analyzer.		
HP 70205A Graphics Display	\$5,000	
All the capability of the HP 70206A system graphics display in a 3/8-width module.		
HP 70900A Local Oscillator	\$14,700	
This 3/8-width module provides a swept LO signal of 3.0 to 6.6 GHz, processes video signals, and acts as master controller for the spectrum analyzer. Contains the system firmware to control and coordinate measurements and to output data. Has a minimum 32K bytes of memory for DLPs.		
HP 70902A IF Section (Res BW 10 Hz - 300 kHz)	\$4,100	
HP 70903A IF Section (Res BW 100 kHz - 3 MHz)	\$2,950	
These 1/8-width modules process a 21.4 MHz IF signal received from an RF or external mixer interface module. Contain resolution bandwidth filters, log amplifiers, detection circuitry, and video filters. Used together, provide res BWs of 10 Hz to 3 MHz.		
HP 70904A RF Section (100 Hz - 2.9 GHz)	\$7,890	
HP 70905A RF Section (50 kHz - 22 GHz)	\$10,700	
HP 70905B RF Section (50 kHz - 22 GHz, no attenuator)	\$9,750	
HP 70906A RF Section (50 kHz - 26.5 GHz)	\$12,500	
HP 70906B RF Section (50 kHz - 26.5 GHz, no attenuator)	\$11,500	
These are 1/8-width front-end modules for RF and microwave spectrum analyzer systems. Convert incoming RF signal to a 21.4 MHz IF. The HP 70905B and 70906B do not have input attenuators and are intended for use with HP 70600A/70601A preselectors.		
HP 70907A External Mixer Interface	\$8,680	
This 1/8-width module provides the interface between external mixers and spectrum analyzer systems. Contains an LO amplifier, mixer bias supply, and down-conversion circuitry to convert the 321.4 MHz input IF to a 21.4 MHz IF signal. Frequency range is 18 GHz to 110 GHz using HP 11970 mixers, and 2.7 GHz to 325 GHz using mixers from other manufacturers.		
HP 70908A RF Section (100 Hz - 22 GHz)	\$35,900	
This 3/8-width front-end module provides state-of-the-art tracking preselection from 2.7 to 22 GHz. Uses fundamental mixing from 100 Hz to 22 GHz for sensitivity <-133 dBm from 2-22 GHz.		
HP 70600A Preselector (2.7 GHz - 22 GHz)	\$10,350	
HP 70601A Preselector (2.7 GHz - 26.5 GHz)	\$12,600	
These 1/8-width modules can be used with the HP 70905A/B and 70906A/B RF sections. Provide tracking preselection from 2.7 GHz to either 22 or 26.5 GHz. Low pass filtering is used below 2.9 GHz, and preselectors can be bypassed if desired.		
HP 70620A Preamplifier	\$10,500	
This 1/8-width module covers 2 to 22 GHz. Minimum small-signal gain is >22 dB; typically >29 dB. Noise figure is <11 dB; typically <9 dB. Flatness is ±1.8 dB. Sends calibration data to a microwave spectrum analyzer to compensate for preamp gain and flatness.		
HP 70300A Tracking Generator	\$10,350	
A 3/8-width module whose output signal tracks the tuned frequency of the spectrum analyzer. Makes stimulus-response measurements with a dynamic range of 125 dB in conjunction with an HP 70000 spectrum analyzer. Frequency range is 20 Hz to 2.9 GHz.		
HP 70301A Microwave Tracking Generator	TBA	
A 3/8-width module whose output signal tracks the tuned frequency of the spectrum analyzer over a 2.7 to 18 GHz frequency range. When used with the HP 71210A spectrum analyzer, stimulus-response measurements can be made over a 120 dB dynamic range. Use with the HP 70300A RF tracking generator to provide a tracking signal from the output over a 10 MHz to 18 GHz range.		
HP 70310A Precision Frequency Reference	\$4,930	
Option 001 Add Distribution Amplifier	+\$1,530	
Option 002 Delete Ovenized Oscillator and External Power Pak	-\$2,450	
This 1/8-width module supplies precise reference signals at 10 and 100 MHz. Signals are phase-locked to an internal ovenized oscillator, improving system frequency reference accuracy after one year from 3 to 0.1 ppm. External reference input allows the use of house standards or other external references at 1, 2, 5, or 10 MHz.		
Option 001 adds two distribution amplifiers, each with three outputs and one input. Option 002 deletes the ovenized oscillator and external power pak but retains the external reference input capability.		
HP 70700A Digitizer	\$7,650	
This 1/8-width module adds precision digitizing capability to HP 70000 instruments. Improves analyzer ability to characterize signals in the time domain. Has a sampling rate of 20M-sample/sec, 10 bits/sample, and 256K words of memory.		
Digitizing rate improved by a factor of 1000 allows faster start-to-stop frequency sweeps and better resolution of signals such as pulsed RF. Sweep times as fast as 80 usec can be made in zero span (time domain).		
Can also be used as a stand-alone, programmable waveform recorder, transient analyzer, or digitizing oscilloscope. For multi-channel applications, up to eight digitizer modules will operate synchronously in a single HP 70001A mainframe.		
HP 70100A Power Meter	\$2,500	
Option 003 Move Ref. Oscillator to Rear Panel	\$0	
A full-feature, single-channel power meter in a 1/8-width module. Fully compatible with HP 8480 series power sensors. See page 210.		
HP 70591A 1/8-width Module Part Kit	\$750	
HP 70592A 3/8-width Module Part Kit	\$800	
HP 70593A 3/8-width Module Part Kit	\$1400	
HP 70594A 1/8-width Module Part Kit	\$2,500	
HP 70595A Module Development Design Guides	\$600	
HP 70596A Module Communication Design Guides	\$600	
Module Part Kits and Module Design Guides provide information and hardware to aid you in the design and fabrication of modules to meet your specific needs.		
HP 70900-60121 Scalar/Spectrum Analyzer Personal-ity	\$250	
Adds scalar measurement personality to an HP 71100A system that also includes an HP 70300A tracking generator. Useful measurement routines include pass-fail and open/short/ thru calibration testing; dual displays, shape factor, and 150 dB display. On 3 1/2" or 5 1/2" discs for HP series 200/300 controllers with BASIC 3.0, 4.0, or 5.0 (included in HP 71100XL system).		
HP 11970 Harmonic Mixers (See page 143.)
